Subject: Draft Source Control Proposed Plan Wilcox Oil Company Superfund Site

Jason and Chelsea, please find attached the electronic draft of the Source Control Proposed Plan. A formal letter requesting consultations and review will arrive in the mail.

The purpose of this document is to propose cleanup action for the source areas we have identified as the remedial investigation continues. This document is specific to these source areas and will provide us with a pathway to address these areas earlier in the process and prior to completing the full site characterization and risk assessments. All remaining aspects of the site (e.g., remedial investigation, feasibility study, risk assessments, etc) will continue concurrent with this proposed plan. Final site-wide documentation will be provided in the remedial investigation report, the human health and ecological risk assessments, the feasibility study, and finally the site-wide decision document.

The documents attached are listed and described below. Once comments are received and incorporated, the document will be formatted to include the figures and text boxes in the appropriate locations and the document will be release to the public for review and comment. Thank you for your time and review. Please call with any questions.

The Honorable Bill John Baker
Principal Chief
Cherokee Nation
P. O. Box 948
Tahlequah, OK 74465

RE: Wilcox Oil Company Superfund Site

Dear Principal Chief Baker:

The purpose of this letter is to extend an invitation to the Cherokee Nation to conduct government-to-government consultation with the U.S. Environmental Protection Agency (EPA) Region 6 regarding oil refining impacts at the Wilcox Oil Company Superfund Site. The EPA anticipates proposing a remedial action to address specific source materials at the site in April 2018. The purpose of the consultation is to provide information to the Cherokee Nation's leadership about the proposed action and to solicit input.

The consultation will be conducted in accordance with the EPA Policy on Consultation and Coordination with Indian Tribes. The EPA's anticipated timeline for the consultation and coordination is from the date of this letter until 30-days. During this time, the EPA will request a meeting with Cherokee Nation leadership for consultation and will continue to work at the staff level to provide information to the Cherokee Nation environmental staff.

The draft Source Control Proposed Plan (Plan) has been provided electronically to Cherokee Nation environmental staff. The Plan includes the evaluation of three options and is proposing Excavation and Offsite Disposal for the nine (9) identified source areas. The total estimated volume of source material is approximately 34,622 cubic yards at an estimated cost of \$5,260,232.

We value the observations, insights and recommendations of the Cherokee Nation leaders and members, and pledge to remain engaged as we continue to work on this site. Should you have any questions or concerns, please do not hesitate to contact me at (214) 665-6701, or your staff may contact Katrina Higgins-Coltrain at (214) 665-8143 or coltrain.katrina@epa.gov. If you have any questions about the consultation process, please contact Randy Gee, Region 6 Office of Environmental Justice, Tribal and International Affairs, at (214) 665-8355.

Sincerely,

A handwritten signature in blue ink, appearing to read "C. Edlund", is written over a faint circular stamp.
